Market Comment

Earlier this month, the Bank of Japan left the era of negative rates by raising them to a level not seen since 2008. The rise of the yen marked the end of the carry trade and caused an excessive reaction on global financial markets, the sharp rise in volatility being the main marker. Across the Atlantic, at the Jackson Hole symposium, the Fed chairman declared that "the time has come for policy to adjust", opening the way for a rate cut that we believe to be significant.
